DETAILED ACTION

In view of the board of appeals filed on 12/12/07, PROSECUTION IS HEREBY REOPENED. A new ground set forth below.

To avoid abandonment of the application, appellant must exercise one of the following two options:

(1) file a reply under 37 CFR 1.111 (if this Office action is non-final) or a reply under 37 CFR 1.113 (if this Office action is final); or,

(2) initiate a new appeal by filing a notice of appeal under 37 CFR 41.31 followed by an appeal brief under 37 CFR 41.37. The previously paid notice of appeal fee and appeal brief fee can be applied to the new appeal. If, however, the appeal fees set forth in 37 CFR 41.20 have been increased since they were previously paid, then appellant must pay the difference between the increased fees and the amount previously paid.

A Supervisory Patent Examiner (SPE) has approved of reopening prosecution by signing below: /Michael R Mansen/

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, last line, "door type" is vague and indefinite.

Claim Rejections - 35 USC § 103

Claims 1-6, 8-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rutan 4641800 in view of Rutan ATTT.

Rutan discloses that canards with pitch control surfaces on an aircraft with no empennages and two significant horizontal surfaces are well known in the art. Rutan lacks the door at the rear of the fuselage.

It would have been obvious to one skilled in the art at the time the invention was made to have used doors at the end of the fuselage in Rutan's system as taught by Rutan ATTT to easily load cargos and to increase maneuverability.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rutan 4641800 as modified by Rutan ATTT as applied to claim 1 above, and further in view of admitted prior art that successful testing of a canard aircraft with a single tractor engine that was witnessed.

Rutan 4641800 as modified by Rutan ATTT discloses all claimed parts except for the tractor engine. However, the admitted prior art that tractor engines are well known in the art.

It would have been obvious to one skilled in the art at the time the invention was made to have used a tractor engine in Rutan 4641800's system as modified by Rutan ATTT and as taught by the admitted prior art to have the predictable result of more efficient thrust production.
